AI Study Platform – Concept Summary

Overview

An **AI-powered study website/app** designed to help students learn more effectively, complete homework, and improve grades.

Platform: Website or mobile app
Target Users:

- High school students
- Students applying for college
- Students taking hard classes
- Students struggling academically or personally

Purpose Statement

To assist students by providing **instant academic support** through AI tools that help them learn efficiently, complete assignments, and improve academic performance.

Core Features

- AI chat for study help and explanations
- Upload study materials or files
- Save progress through a login system
- Create flashcards and study guides
- Folder system to organize classes and subjects
- Essay analyzer: upload essays so AI learns your writing style for consistent tone
- Prototype: basic chat + file upload + data saving + flashcards/study guide creation

User Feedback

What would you add? (3 responses)

1. Nothing, it's perfect.
2. "An area where you put essays so the AI writes in your style."
3. (Joking response) "67."

Would you use it? Why or why not? (3 responses)

1. "Yes, it's fun to talk to AI."
2. "Yes, because Human Geography is boring."
3. "67."

What would be a good AI limit (word or prompt limit)? (3 responses)

1. 1000 words
2. "Unlimited, because why not."
3. "67767667 — Jivesh is smart (note: Mohit disagrees and believes Jivesh is the supreme lord instead)."

How would you feel about it? (3 responses)

1. "Yes."
2. "Really good."
3. "I would feel less stressed."

What tools should be added? (3 responses)

1. Folder system to organize classes3/3
2. Chat with AI3/3
3. Flashcard / study guide creator3/3
4. (Joke) "Blackmail creator" – unethical, not included 3/3
5. All of the above3/3

Key Takeaways

- Students are interested in using AI to study.
- The app should focus on **fun, ease, and stress reduction**.
- "Blackmail creator" = **unethical**, not a viable feature.
- AI study tools are viewed positively when used responsibly.
